

### *Who we are*

Convertec Ltd. is a trading company, established in 1989, with a small, highly skilled and experienced workforce, located in Wexford, South-East of Ireland. We are involved in the design and development of Switch-Mode Power Supplies for a variety of applications, including industrial, medical and energy industries.

### *What we do*

Convertec Ltd., utilising outsourced manufacturing, supplies leading edge technology Switch-Mode Power Supplies, to a diversity of applications in a worldwide market. Many of our products are installed in industrial, medical, energy management and transport applications. Our commitment to research, development and quality, has secured our position in a highly competitive business

### *What we offer*

A student engaged by Convertec Ltd. will experience first-hand, the sense of purpose, responsibility and achievement, of working in a creative atmosphere. The daily interaction with people from each operational department, and the informal but effective approach to work will give the student a better understanding of the expectations and rewards of a real working environment.

### *What we expect*

A student seeking an internship with Convertec Ltd., will self-motivated, goal-driven, focussed and work well within a team. The student will have the skills necessary to take a project from concept to implementation with a systematic approach. The ability to effectively plan, report and communicate is of central importance

## L'Irlande, pourquoi pas vous?

Venez nous rejoindre en Irlande!

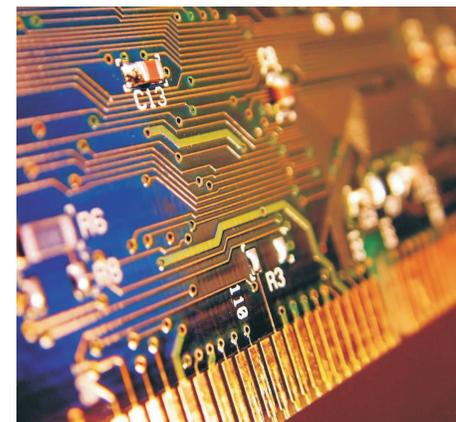

### *Come and Visit Ireland!*

Modern Ireland has moved a long way from the romantic image so often portrayed in movies and literature. It is a modern, dynamic, vibrant and outward-looking country with a wealth of culture and heritage, and a diversity of people. Come visit Ireland to live and work, and experience it for yourself.

### *Internships at Convertec Ltd.*

Convertec Ltd. has over the years worked closely with many technical universities and colleges, to engage students seeking industrial internships, as part of their course requirements. This close working relationship has proven to be very positive, and has resulted in the establishment of a variety of projects, which form a valuable resource for our Design and Test departments.
