## **Micro- and Nano-reinforced Composites**

Forma: odczyt, Liczba godz. 3

Ass.-Prof. Gerhard Sinn  
BOKU – University of Natural Resources and Life Sciences, Vienna  
Department of Material Sciences and Process Engineering  
Institute of Physics and Materials Science

### **Abstract:**

Composites were invented to combine some favourable sometimes excluding properties in one material, which cannot be achieved with traditional engineering materials. Within this lecture some new composites will be presented as well as their characterization methods.

### **Learning outcomes**

The students should get an overview of actual research activities in the field of composites and have learned new techniques to characterize them.
