

Name of the advisor: Jarosław Przewłócki**Academic title:** prof. PhD, D.Sc, Eng.Orcid ID number: <https://orcid.org/0000-0001-5617-290X>**Department of** Technical Fundamentals of Architecture Design**Faculty of** Architecture**Gdańsk University of Technology****Phone:** (58) 347 17 77**E-mail:** jprzew@pg.edu.pl**Personal web page:** https://pg.edu.pl/38da053032_jaroslaw.przewlocki/wizytowka**Disciplineⁱ** architecture and urbanism, civil engineering and transport**Bibliometric indicators**

1.	Number of journal publications in WoS/ Scopus	14/26
2.	Citations (WoS/Scopus) excluding self-citations	47/82
3.	Hirsch index (WoS/Scopus)	4/5
4.	Hirsch index in Google Scholar	8
5.	Citations in Google Scholar	175

1. The number of PhD students who have graduated under your supervision: 3

2. The number of PhD students currently supervised: 1

3. Are you currently accepting new PhD students:

- a. Polish Yes
- b. Foreign Yes

Research interests or topics offered for PhD research (no more than 2000 characters)ⁱⁱ

Research interests.

direction of his scientific activities are researches on random events and application of probability and theory of reliability in civil engineering, in particular in geotechnics. He specializes, among others, in slope stability problems (deterministic and probabilistic analysis), foundations of historical buildings.

offered for PhD research:

and structural problems in historic buildings

The studies cover issues related to the assessment of technical condition, modernization, reconstruction and protection of historic structures, especially including their foundations.

2) Foundations of reliability in civil engineering

The purpose of the research is to analyse different cases of structural reliability, including the review of the basic methods of this theory, randomness of strength-load parameters in structural analysis. They include among other space truss, foundation footing or earth layer subjected to earthquake.

Basic
