Are you considering studying at Johannes Gutenberg University (JGU) for one or two semesters as an exchange student? If so, we are happy to present the Gutenberg International School (GIS).

The GIS course program offers courses specifically designed for exchange students from all fields of study who have either no, intermediate or advanced knowledge of German. These courses have a particular focus on German history, literature and social sciences but they offer plenty of opportunities for gaining intercultural knowledge as well.

Furthermore, JGU offers several hundred courses across all academic fields taught in English, French, Spanish and other languages which are open to exchange students.

You can find a complete list of these courses as well as more information on the GIS course program at www.international-office.uni-mainz.de/exchange/gis

The Gutenberg International School Services (GIS Services) are your main contact for your study abroad at JGU. You can study at JGU via the ERAMUS+ program, through a partner institution or with a scholarship from a German or international organization (e.g. DAAD, Fulbright). It is also possible to organize a study abroad yourself as a free mover. The GIS Services offer advice and information on the following topics

-  Exchange Student Application
-  Accommodation
-  Health Insurance and Visa
-  Course Registration
-  General Orientation
-  Study start in Mainz
